

FREE Screening Mammograms.

Franciscan Breast Center, Burien

A screening mammogram is a routine exam for women who have no sign or symptoms of breast disease. It uses X-ray to make an image of the breast. The goal of a screening mammogram is to identify breast abnormalities as early as possible. If breast cancer is found early, there are more treatment options and a better chance for survival. Virginia Mason Franciscan Health advises women to get screening mammograms every year starting at age 40.*

If you haven't had a screening mammogram in two years or more, we're offering FREE screenings for women who are uninsured or underinsured.

- No clinical breast exam needed
- No referral necessary

Wednesday, August 4

2 – 5 p.m.

Franciscan Breast Center

Franciscan Medical Pavilion at Highline
16045 First Avenue South, Burien, WA 98166
